Re: Letter of Recommendation

This past June CPR finished up on a painting project for the Regatta Point Condominium Association. Regatta Pint is located at 1000 Riverside Dr. Palmetto FL. There are two building, both six stories tall. The building had been painted in the last ten years.

The board of directors picked gray and white with a dark blue for the doors for the colors. The buildings are 30 plus years old and have a heavy stucco finish.

The finish product was nothing more than perfect. The transition between the gray and white in the corners of the building had to be painted by a descendent of Michael Angelo. It is actually hard to go out to the property and not starat the buildings, they look that great.

Not only did CPR do an incredible job on the painting, but they started and finished on schedule. The painting crew was made up of pleasant hard working individuals. Never was the any concern with language, music or any other issue you sometimes have on projects like this. I am not sure you could have ask for anything better.

I will always have CPR bid on any painting or restoration projects on association we manage. They truly made our job easy on this project.
